

School is Closed

I usually go to school on weekdays. I like to go to school, but my school is closed today. My school is closed to help me stay safe.

There is a sickness that some people have. It is a virus. It is called Coronavirus. The Coronavirus is spread from people to people. It is spread when someone who has the virus coughs or sneezes on someone who doesn't have the virus.

I have had a cold virus before. I had a stuffy nose and my throat was sore. I felt sick for a few days, but then I got better.

This virus is different than other viruses. It is causing many people to get sick. So, to stay safe, the Governor decided it is best to close all schools for a few weeks.

The Governor will let us know when it is ok to open schools. I will return to school soon.
